

Assignment -2
Python Programming

Assignment Date	19 September 2022
Student Name	Mr.S.Aslam Basha
Student Roll Number	812419106009
Maximum Marks	2 Marks

Build a python code, Assume u get temperature and humidity values (generated with random function to a variable) and write a condition to continuously detect alarm in case of high temperature.

```
import random
from time import sleep
def generate_values():
    temperature = random.randint(14, 50)
    humidity = random.randint(10, temperature)
    return humidity, temperature
humidity = temperature = 0
while temperature < 45:
    humidity, temperature = generate_values()
    print('Humidity:', humidity, 'Temperature:', temperature)
    sleep(0.50)
print('High Temperature Detected')
```

OUTPUT:

```
Humidity: 10 Temperature: 20
Humidity: 20 Temperature: 30
Humidity: 24 Temperature: 35
Humidity: 23 Temperature: 49
High Temperature Detected
```

```
Python 3.7.0 Shell
