Assignment -1
Python Programming

Assignment Date	19 September 2022
Student Name	Mr.A.Absarkhan
Student Roll Number	812419106003
Maximum Marks	2 Marks

Build a python code, Assume u get temperature and humidity values (generated with random function to a variable) and write a condition to continuously detect alarm in case of high temperature.

import random

from time import sleep

def generate_values():

  temperature = random.randint(10, 50)

  humidity = random.randint(10, temperature)

  return humidity, temperature

humidity = temperature = 0

while temperature < 45:

  humidity, temperature = generate_values()

  print('Humidity:', humidity, 'Temperature:', temperature)

  sleep(0.50)

OUTPUT:

Humidity: 10 Temperature: 11

Humidity: 10 Temperature: 49

High Temperature Detected
